

Creating Customers For Life™

GoldMine® Plus Accounting

for use with QuickBooks® Pro/Premier 2002

GOLDMINE® PLUS ACCOUNTING FOR USE WITH QUICKBOOKS® PRO/PREMIER 2002 PROVIDES SEAMLESS FRONT AND BACK-OFFICE DATA INTEGRATION BETWEEN GOLDMINE AND INTUIT'S BEST-SELLING ACCOUNTING APPLICATION.

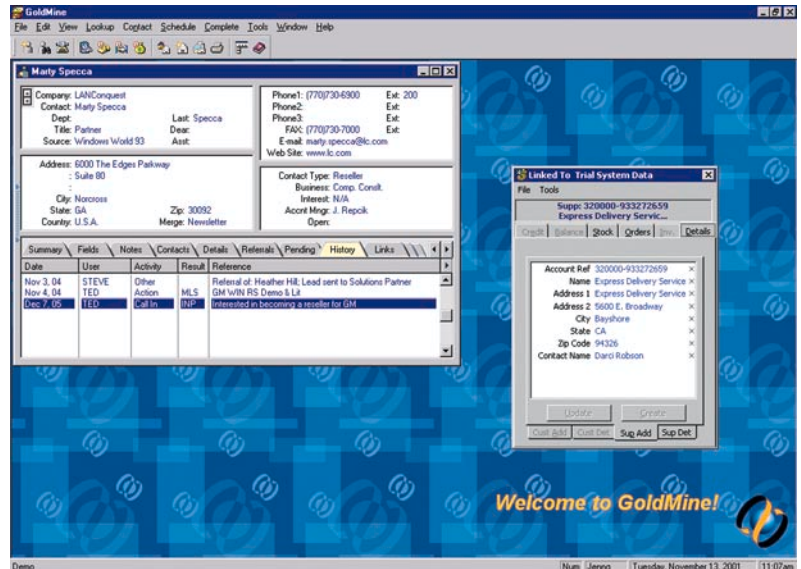

Customer relationships are the single biggest contributor to your bottom line. Every interaction with a customer has some impact on sales, expenses or inventory.

Accounting systems help track the impact of every business transaction — but access to this information for customer facing employees is cumbersome at best, and impossible at worst.

Until now.

Designed for business people that are tired of using separate, unrelated systems to access customer, sales, accounting and operational data, GoldMine Plus Accounting solves this problem by connecting the front office to the back office to provide a single, unified record for all transactions that relate to a customer. GoldMine Plus Accounting allows the user to access accounting information for a customer, without ever having to work in QuickBooks Pro and without implementing a complex enterprise system or an expensive customized solution.

A real-time window appears to show the GoldMine user's current balances from the accounting system.

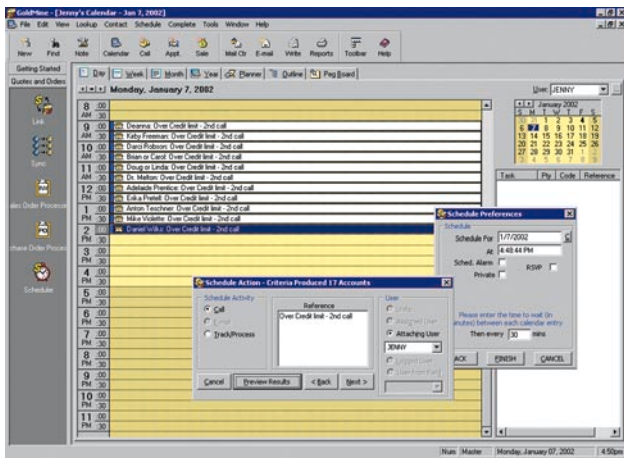

GoldMine[®] Plus Accounting

for use with QuickBooks[®] Pro/Premier 2002

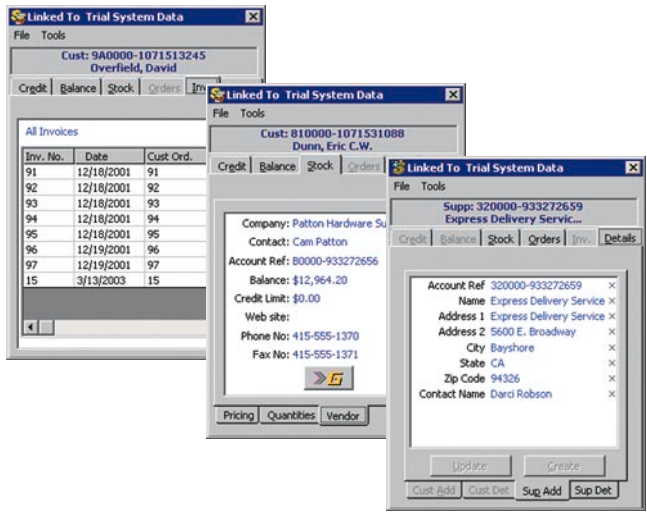

GOLDMINE PLUS ACCOUNTING WILL ALLOW YOU TO:

- Maintain consistent contact data across the sales and accounting systems.
- View critical accounting data without forcing sales users to work in QuickBooks Pro.
- Generate quotes and gain access to order entry.
- Schedule activities or attach Automated Processes™ in GoldMine based on data in QuickBooks Pro.
- Store, view and update fields in GoldMine with data from QuickBooks Pro.

GOLDMINE USERS CAN VIEW:

- Invoices, with drill-down capability to view specific invoices and status.
- Credit information, including the amount currently available.
- Balance, broken down by current and 30/60/90 day status.
- Inventory, with drill-down capabilities.
- Purchase orders, with drill-down capability to view specific orders and status.

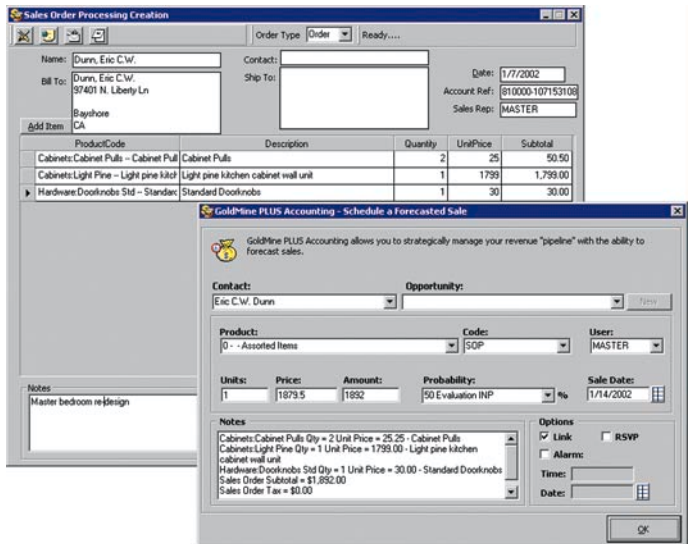

WITH INVOICES, GOLDMINE PLUS ACCOUNTING WILL AUTOMATICALLY:

- Complete a forecasted sale in GoldMine and update the history.
- Save the order in QuickBooks Pro.
- An estimate will create a forecasted sale that can be accessed from the linked contact's Pending tab.
